## Checkout integration

In order for the payment method to be present in the checkout page you need to enable it in the admin area Woocommerce \ Settings \ Payments, this will look something similar with the image below.

☒ BT iPay

Pay with Transilvania Bank

Your personal data will be used to process your order, support your experience throughout this website, and for other purposes described in our [privacy policy](#).

Place order

## Card On File

The card on file functionality is enabled in the admin payment configuration page, after you activate this functionality a new checkbox will be displayed in the checkout page under the payment description that will allow the customer to choose between saving or not saving their card information.

BT iPay 

Pay with Transilvania Bank

☐ Save my card for future uses

After a successful payment with a this option enabled the customer on a future order will be presented with a select box that will allow the user to choose one of the saved cards, beside the saved cards the customer can do a payment with a new card by toggling the checkbox “ I want to pay with a new card” this new card can also be saved if desired.

BT iPay 

Pay with Transilvania Bank

☐ I want to pay with a new card

Select saved card

000000\*\*0000- Popescu Ion ▼

Additionally to this functionality the customer can also manage their saved card from the customer account panel by navigating to “My Account \ Bt Ipay Saved Cards”.

# My account

> Control panel

Hi **admin** (not **admin** ? [Log out](#) )
